

# IPG® laser generators

**IPG Photonics** is a leading laser generator manufacturer worldwide. Their years of experience guarantee the **highest quality** and the best laser beam parameters. A well-established distribution network and service infrastructure ensure **excellent technical support** for their products. **Laser generators** from the YLR series are available in versions ranging from 500W to 2000W, and the YLS series starts from 2000W.

**IPG Photonics** is also the only company in the industry that, through its in-house production of key components such as active fibers and semiconductor pumping diodes, has an impact on the quality and manufacturing costs of fiber lasers.

The combination of **innovation** with immense production capabilities positions **IPG Photonics** in a rarely encountered position, allowing for **full control** of every step necessary to fulfill the mission of delivering reliable, **high-quality, and efficient** fiber lasers at a competitive price point.

More information is available on the manufacturer's website:
