

## MaxPhotonics<sup>®</sup> Laser generators

**Max Photonics** is a leader in the production of laser generators in the Asian and global markets. The company offers innovative solutions in the field of fiber optic technology, continuously developing and improving its products.

By integrating leading process and energy technologies worldwide, it combines products, control elements, software, and services from end-point to cloud throughout the entire life cycle. This enables integrated management for homes, buildings, data centers, infrastructure, and industry.

Power Density with  
**Flat-Top** Distribution

High-Quality  
**Vertical Integration**

Point Concentricity  
with **High Beam**

**BH** or **LOE** Output

## What sets apart this manufacturer

The manufacturer guarantees **high-quality** components and long equipment lifespan. **Max Photonics** laser generators are easy to maintain and operate, and moreover, they **consume less energy** compared to sources from other manufacturers.
