

RAYTOOLS LASER HEADS

Designed in Switzerland and primarily intended for industrial applications, **RAYTOOLS** laser heads are specially crafted for medium to high-power fiber lasers.

The **dual protective** construction significantly enhances **user-friendliness** during the replacement of the laser head optics, virtually **minimizing the risk** of lens contamination.

AUTO FOCUS

FREE YOUR HANDS, ENJOY AUTOMATIC FOCUS ADJUSTMENT

Autofocus is an **advanced technology** in Raytools laser heads that **precisely adjusts** the distance between the head and the processed material in real-time. Thanks to this feature, users of fiber lasers can achieve **excellent cutting quality**.

ADDITIONAL PROTECTION

The **specialized dustproof** casing **prevents contamination** of the collimation lens, **significantly extending** the lens's lifespan and, consequently, enhancing the **precision** and **efficiency** of the laser beam.
