

Yaskawa® Servo Drives

The **intelligent design** of the Sigma-7 series ensures high overall efficiency and performance for your machines and devices. **Sophisticated features**, such as vibration damping, reduce the load on machine parts and significantly enhance their efficiency

YASKAWA Electric is one of the leading global manufacturers in the field of drive technology, industrial automation, and robotics.

CHARACTERIZED PRIMARILY BY:

- High efficiency
- Low heat emission
- Dimensions smaller by up to 20%
- High compatibility
